Editorial

© Tsinghua University Press and Springer-Verlag Berlin Heidelberg 2011

On March 2, 2011, like any other work day, I opened my mail box as usual, and found one email that came from Thomson Reuters:

Dear Dr. Yang,

I am pleased to inform you that the journal of Building Simulation has been selected into our database. It will be indexed in the Science Citation Index Expanded and Current Contents/Engineering, Computing and Technology. Congratulations!

Then on July 16, 2011, I received another email from the SCOPUS team:

Title: Building Simulation

ISSN / E-ISSN: 1996-3599 / 1996-8744

Publisher: Tsinghua University Press / Springer

Dear Xudong Yang,

*The title mentioned above has been evaluated for inclusion in Scopus by the Content Selection & Advisory Board (CSAB). The review of this title is now complete and the CSAB has advised that the title will be **accepted** for inclusion in Scopus. For your information, the reviewer comments are copied below:*

The journal fulfills all requirements for been accrued to SCOPUS

The above notices simply mean that after three years of its initial launching, our *Building Simulation* journal has been recognized by the most popular abstracting/indexing databases in the scientific community. Nearly all researchers use these databases to search for information, this important development means that research published in our journal will be more visible to the scientific community.

So what is the next goal?

Simple enough: to ensure that papers published in *Building Simulation* are of higher quality. In fact, this has never changed.

We would like to take this opportunity to thank you for your invaluable contributions to the journal. Together let's make our journal a better one.

Xudong Yang; Ph.D.
