I am delighted to announce that Anna Herforth has agreed to accept the position of Senior Editor of Food Security from September this year, joining the three other Senior Editors, Eric Craswell, Stephen Waddington and Ulrike Grote who are responsible for the Physical, Biological and Economic/Political environments, respectively. Anna will be responsible for the Nutritional/Sociological environment for which, as you will appreciate from her biography, she is extremely well qualified.

Anna Herforth is a researcher and consultant specializing in the links between nutrition, agriculture and the environment. She is an adjunct Associate Research Scientist at Columbia University, and consults for the World Bank, the UN Food and Agriculture Organization (FAO), and USAID's SPRING Project, among others. She has worked with universities, nonprofit organizations, and the CGIAR on food and nutrition in Africa, South Asia, and Latin America. She holds a Ph.D. from Cornell University in International

Nutrition, an M.S. in Food Policy from Tufts Friedman School, and a B.S. in Plant Science from Cornell University. She is a founding member of the Agriculture-Nutrition Community of Practice, a professional community with members from over 85 countries.
