In the article entitled: “From the *Journal* archives: Cyclopropane: induction and recovery with a bang!” published Online First and in the print version of the August 2014 issue of the *Journal*, Can J Anesth 2014; DOI [10.1007/s12630-014-0109-x](https://doi.org/10.1007/s12630-014-0109-x), the following Editors' Note should have been included. The publisher apologizes most sincerely for this error.

Editors' Note: Classics Revisited

Key Articles from the *Canadian Journal of Anesthesia* Archives: 1954–2013

As part of the *Journal's* 60th anniversary Diamond Jubilee Celebration, a number of seminal articles from the *Journal* archives are highlighted in the *Journal's* 61st printed volume and online at: www.springer.com/12630. The following article was selected on the basis of its novelty at the time of publication, its scientific merit, and its overall importance to clinical practice: *Lucas GHW*. The discovery and pharmacology of cyclopropane. Can Anaesth Soc J 1960; 7: 237-56. Drs. Michael P. Bokoch and Adrian W. Gelb provide expert commentary on the discovery and use of a remarkable hemodynamically stable, rapid onset of action, anesthetic gas, the widespread use of which ultimately ended due to its proclivity for explosion.
