Erratum to: Environ Earth Sci DOI 10.1007/s12665-015-4702-2

The original article has been published inadvertently with some errors in the Fig. 8. The tidal curves of frames (c) and (d) of Fig. 8 were interchanged by mistake. The corrected figure is given below:

Fig. 8 Variation of stratification parameter (ΔS) in Zuari estuary over a tidal cycle during spring–neap phases of the three seasonal cycles. *D*, *C*, *B* and *S* indicate Dona Paula, Cortalim, Borim and Sanvordem locations shown at their respective distances from the mouth in the *Y* axis. Corresponding tide variation is given in each diagram. Grey area shows no data. The Selaulim dam discharge rates are negligible during pre monsoon. The discharge rates in units of m^3/s were 84.48 and 85.90 on 1 and 2 August, 61.07 and 50.61 on 9 and 10 August, 11.50 and 11.20 on 23 and 24 October and 10.62 and 10.60 on 29 and 30 October, respectively
