Erratum to: Mindfulness DOI 10.1007/s12671-012-0133-2

In the original version of the article, there is an error in the interpretation of the significant interaction. The second paragraph on page 6 should read as below, and the correct image for Fig. 1 is also presented:

To interpret this interaction, we followed the procedures of Aiken and West (1991). Results indicated that the relationship between past year frequency of racist events and anxious arousal is marginally significantly positive at low levels of mindfulness ($\beta=0.324$ $t=1.90$, $p=0.06$) and not significant at high levels of mindfulness ($\beta=-0.26$, $t=-1.38$, $p=0.17$) (see Fig. 1).
