Erratum to: Wetlands DOI 10.1007/s13157-010-0046-6

The authors would like to make the following clarification to the original article.

Figure 1 indicates the sampling locations of *Spartina alterniflora* in Jamaica Bay, Queens, NY and the New York Metropolitan Area. The following sampling locations indicated in this figure were not explicitly referenced in the text of

the article: Jacobs Landing, Avalon, Sandy Hook, Great Kills, Bayonne, Point Breeze, Bergen Beach, and Yellow Bar. Samples from these locations were obtained from horticultural stock of known origin (i.e. not directly collected in the field) or consisted of fewer than 3 samples. As such, these samples were genotyped but not included in the population level analysis included in the article. The raw genotypic data for all samples, including those mentioned above, are available by request from the authors.

The online version of the original article can be found at <http://dx.doi.org/10.1007/s13157-010-0046-6>.
