<https://doi.org/10.1007/s13164-013-0133-8>

On pages 263, 265, and 266, incorrect degrees of freedom and *t* values were reported. The statistical conclusions are not affected by these reporting errors, but the corrected values are shown below.

p. 263: $t(26) = 9.605$, $p < .001$ should read $t(52) = 5.31$, $p < .001$

p. 265: $t(23) = 12.145$, $p < .001$ should read $t(48) = -2.56$, $p = .014$

p. 266: $t(22) = 9.900$, $p < .001$ should read $t(46) = -3.31$, $p = .002$
