RETRACTION NOTE

Retraction note: Assessment of human biomonitoring and DNA microarray analysis in the vicinity population on an industrial complex

Kyoung-Ho Lee, Eun-Kyung Chung, Jeong-Suk Moon, Suk-Woo Nam,
Mi-Young Lee & Bu-Soon Son

Retraction Note : Mol Cell Tox (2011) 7:207-219.
DOI:10.1007/s13273-011-0027-8

The editors of Molecular & Cellular Toxicology and the publisher want to notify the readers of a retraction of the article entitled “Assessment of human biomonitoring and DNA microarray analysis in the vicinity population on an industrial complex” by Lee *et al.* (2011) 7:207-219.

It was brought to our attention that this article was substantially similar to the article “Biomonitoring of urinary metals in a population living in the vicinity of industrial sources: A comparison with the general population of Andalusia, Spain” published in Science

of the Total Environment by Aguilera *et al.* (2008) 407:669-678. After an internal investigation, the Committee of Research and Publication Ethics for the Molecular & Cellular Toxicology decided to retract the article by Lee *et al.* from Molecular & Cellular Toxicology. All the authors agreed to this retraction.
