The authors regret that the Iranian specimens of *Paratrichodorus teres* were incorrectly assigned as holotypes and paratypes in the above paper.

The second page, last paragraph should read as follows:
“Permanent slides of *P. teres* females ($N=9$: slides TPT001 and TPT002) were deposited at the Nematode Collection of the Department of Plant Protection, Karaj, Iran and ($N=7$: slides 35GO 1 and 35GO 2) at the National Nematode Collection of the Nematology Department, Iranian Research Institute of Plant protection, Tehran, Iran. Additional slides of *P. teres* females ($N=8$: slides RIT822, RIT823 and RIT824) were deposited at the nematode collection of Royal Belgian Institute of Natural Sciences, Brussels, Belgium.”
