The authors in agreement with the Editor-in-Chief wish to retract this article because it was submitted without approval by the complete research team. Moreover, the senior researchers who were unaware of this paper being submitted by MSc student Masuder Rahmann to the “Journal of Applied Genetics” already

published a large part of the results in “Identification of candidate effector genes in the transcriptome of the rice root knot nematode *Meloidogyne graminicola*” by Haegeman A, Bauters L, Kyndt T, Rahman MM, Gheysen G; Molecular Plant Pathology, 2013, 14(4), 79–90. doi:[10.1111/mpp.12014](https://doi.org/10.1111/mpp.12014).
