Regrettably my paper “Neighborliness of marginal polytopes” contains mistakes in the remark “Maximizing Multiinformation”: Corollary 1 there does not include any theorem of the given reference [3], its statement is only a special case of Theorem 5.1 in [3]. Moreover, Corollary 2 does not imply Corollary 1, for which reason it is no longer as general as I claimed. I apologize for this inexactness and wish to thank Nihat Ay and Andreas Knauf for pointing this out to me.
