The following articles are being re-published in their entirety without any changes in *Cellular Oncology*. They were previously published in *Analytical Cellular Pathology*, Volume 33, 2010.

These articles were submitted to the journal *Cellular Oncology*, but due to some misunderstanding and a title change during 2010, they were published in *Analytical Cellular Pathology* and not *Cellular Oncology*.

In order to address this situation, and with the full agreement of the publishers concerned and of the authors, the articles are being re-published in the journal *Cellular Oncology* as originally intended. The articles re-published in *Cellular Oncology*, Volume 34, 2011, should be considered the correct version of record.
