Erratum to: Dermatol Ther (Heidelb) (2017)
7:81–96
DOI 10.1007/s13555-016-0161-2

The authors would like to publish an erratum to correct the mistakes in Fig. 4 legend and in the text under the heading “Study Assessments and Endpoints” in the published article. The correct texts are given below.

1. Under the Fig. 4 legend the text currently reads: “a Partial clearance defined as $\leq 75\%$ reduction in the number of clinically visible

AK lesions. 5-FU/SA 5-fluorouracil 0.5%/salicylic acid 10%, AK actinic keratosis”.

The figure “ $\leq 75\%$ ” should be “ $\geq 75\%$ ”.

2. The first paragraph of “Study Assessments and Endpoints” has repeated text. The text “and proportional change from baseline in the total number of lesions at each treatment visit and 8 weeks after the end of treatment.” should be removed.

The online version of the original article can be found under doi:[10.1007/s13555-016-0161-2](https://doi.org/10.1007/s13555-016-0161-2).
