New Year's Resolutions

Dear Reader,

this issue marks the start of the 77th year of MTZ. As you might expect, the publishers and the editorial team have made some good resolutions for 2016 and you are already looking at the first of them. The international digital edition of MTZ and its sister magazines ATZ and ATZelektronik are now available as genuine e-magazines. As a subscriber to our worldwide edition, in the past you have been able to read the English versions of technical articles in PDF format. Now we have moved up a gear and are offering you even more content. From now on, our "In the Spotlight" feature, news about companies and new products, an interview relating to our cover story, a guest commentary column and, of course, the familiar articles on the industry and the latest developments in the field of research will be available for you to read in a user-friendly format with new functions.

In concrete terms, this means that you can access the international e-magazines from any web browser, regardless of the operating system, and on PCs, tablets and smartphones. The HTML5 standard will also allow us to include multimedia content in future, which means that we can offer you genuine added value. The interactive contents page enables you to move quickly to the article you want to read. Using the search function enables you to search the entire issue rapidly for a specific keyword. In addition, you can access social media sites directly from every page, which will allow you to tell your colleagues about interesting arti-

cles. Of course, you can also save the content in PDF format and print it out in the familiar way and, as usual, you can access it from MTZ-worldwide.com. All the 2015 issues are now available as e-magazines and, naturally, you can still use the PDF archive.

We hope this helps you get off to a good start in the New Year. We would be grateful if you could inform your colleagues about the new international e-magazine. You will soon be able to find out more about our remaining resolutions.

With best regards and best wishes
for a successful 2016,

Dipl.-Journ. (FH) Martin Westerhoff
Deputy Editor in Chief
