The Indian National Academy of Engineering (INAE), founded in 1987, has as its distinguished fellows India's most eminent engineers, engineer-scientists and technologists representing the entire spectrum of engineering disciplines. The aims and objects of the INAE are to promote and advance the practice of engineering and technology and their applications to solving problems of national importance. The INAE also encourages inventions, investigations, and research in pursuit of excellence in the field of 'Engineering'. Its activities *inter alia* include programmes on issues of technology policy and engineering education. The INAE is a member of the Academy of the International Council of Academies of Engineering and Technological Sciences (CAETS), and it participates in its various programmes of global concern.

The INAE is privileged and happy to launch the INAE Letters, a quarterly journal, to provide a medium for rapid publication of new research results and invited review articles across different domains of engineering science and technology in the fields of Aerospace Engineering, Chemical Engineering, Civil Engineering, Computer Engineering and Information Technology, Electrical Engineering, Electronics and Communication Engineering, Energy Engineering, Mechanical Engineering, Mining, Metallurgical and Materials Engineering, and Interdisciplinary Engineering. The responsibility and initiative for extending invitations for contribution of review articles would reside with the members of the Editorial Board.

The INAE Letters is served by highly qualified and experienced scientists and engineers of repute comprising the Editorial Board. The Editors of the INAE Letters have largely been drawn from the intellectual and academic resources that the INAE has in its Fellowship. The Editorial Board, supported by the external peer reviewers, would be responsible for the publication of the INAE Letters. For the guidance and support in bringing out this journal we are grateful to our Editorial Advisor, S.C. Dutta Roy, and the domain Editors: Santanu Bandyopadhyay (Energy Engineering), Bikramjit Basu (Mining, Metallurgical and Materials Engineering), Subrata Chakraborty (Civil Engineering), Suman Chakraborty (Mechanical Engineering), Sivaji Chakravorti (Electrical Engineering), A. Chokalingam (Electronics and Communication Engineering), Deepankar Choudhary (Civil Engineering), Debabrata Das (Energy Engineering), Pradip Dutta (Mechanical Engineering), S. Gopalakrishnan (Aerospace Engineering), Debatosh Guha (Electronics and Communication Engineering), V. Kumaran (Chemical Engineering), Indranil Manna (Mining, Metallurgical and Materials Engineering), Sukumar Mishra (Electrical Engineering), Sushmita Mitra (Computer Engineering), Sanjay Mittal (Aerospace Engineering), A.B. Pandit, (Chemical Engineering), C. Siva Ram Murthy (Computer Engineering), Shanthi Pavan (Electronics and Communication Engineering), Kota Bhanu Sankara Rao (Mining, Metallurgical and Materials Engineering), Prasun Kumar Roy (Interdisciplinary Engineering), Manoj Kumar Tiwari (Interdisciplinary Engineering).

Under the leadership of the Editorial Board, this new journal will target a minimum possible peer-review time and speedy publication while continuing to improve the publication quality. We look forward to receiving the continued support of the contributors, readers and the publishers of the INAE Letters.
