

Challenges in managing intranets

Chair: *Sigmund HANDELMAN*, IBM T.J. Watson
Research Center, U.S.A.

Panelists: *Alan GEBELE*, Bellcore, U.S.A.
Greg BOWMAN, Tivoli Systems, Inc., U.S.A.
Chad KEESLING, Chrysler Corporation, U.S.A.
Glenn GIANINO, Computer Associates, U.S.A.

The Internet has won over in the corporate networks and intranets are becoming a vital support to their business. New paradigms of management are emerging to extend to cover business processes and activities. Large multi-site corporations will need to manage clusters of intranets bridged through public networks, giving rise to new management challenges.

This panel will discuss management issues in this new environment and will combine points of view from Research, Commercial Applications and actual Industrial experience.
