Throughout the Lifespan*, DOI 10.1007/978-3-319-09822-7\_3

---

**DOI 10.1007/978-3-319-09822-7\_8**

On page 30, the citation Fig. 5.1 in the paragraph “Neurons come in a variety...in the form a neurotransmitter” is incorrect.

The correct citation should read as follows.

These are indicated in the prototype of a neuron in Fig. 3.1: *first* is an input region (a), *second* a region that triggers a nerve impulse (b); *third*, the nerve impulse is then propagated along a projection serving impulse conduction called *axon* (c); this region of conductivity is subdivided into different subregions by the *nodes of ranvier*.
