

Correction to: Dragonfly Nymphs of North America

Correction to:
K. J. Tennessen, *Dragonfly Nymphs of North America*,
<https://doi.org/10.1007/978-3-319-97776-8>

This book was inadvertently published without updating the following corrections. The book has been revised with these corrections.

Corrections:

Chapter 2:

p. 29: 2nd column, in the Lutz reference after *Lestes eurinus*, “say” was changed as “Say”

Chapter 4:

p. 52: *Tholymis citrina* Hagen: “, 1867” was added after Hagen

Chapter 6:

p. 94, Couplet 9, 2nd line: “ratio of prementum L: max W <4.5 mm” was changed to “prementum max W <4.5 mm”

p. 94, Couplet 9', 2nd line: “ratio of prementum max W >4.5 mm” was changed to “prementum max W >4.5 mm”

p. 120: under *C. adnexa*, AZ, TX was added

p. 135: under *N. pentacantha* HEAD, line 5, “with” was deleted; also description of head tubercles was added

Chapter 7:

p. 213, Couplet 11: changed first character in couplet 11' to “Dorsum of S10 and epiproct variable, not granulate (Fig. 7.102b) to sometimes granulate;”

p. 213, Couplet 11: Change second character in couplet 11' to “S6 posterolateral spine L 0.32–0.52 mm, . . .”

p. 214: in Figs. 7.103 & 7.104, the species names were reversed; (a) should be *G. externus*, (b) should be *G. fraternus*

The updated version of the book can be found at
<https://doi.org/10.1007/978-3-319-97776-8>

p. 215, 2nd column, 2nd paragraph (text for Couplet 11), lines 9-10: Replace phrase “S6 spine length converges at 0.36 mm in the two species, but no further overlap was found.” with “S6 spine length is usually greater in *G. hybridus* (0.32–0.47 mm versus 0.20–0.35 mm in *G. gonzalezi*), but there is overlap between the two species from 0.32 to 0.36 mm.”

p. 226: in Table 7.10, for *H. geminatus*, head width should be 4.40, not 44.0

p. 259: Fig. 7.190 was replaced

p. 262: changed “*Phanogomphus borealis* and *P. spicatus* lack posterolateral spines on S6.” to “*Phanogomphus borealis* and *P. spicatus* nearly always lack posterolateral spines on S6 although rarely *P. spicatus* can have a small spine on S6.”

p. 287, couplet 5 and 5': “mm” was added after abdomen width

Chapter 8:

p. 299. Error in page numbers in generic key after each genus *Tachopteryx* was changed as (p. 299) instead of (p. 283), *Tanypteryx* was changed as (302) instead of (p. 286).

p. 303. **Head**, 2nd line: “antennomere” was replaced with “antennomeres”

Chapter 10:

p. 338. Error in leader in couplet 4: should go all way to right margin (..... 6)

Chapter 11:

p. 362, couplets 5 and 5'. “mm” was added to >8.0 and <8.0

p. 369, 1st column, 3rd line: “dorsal rim without setae” was deleted and replaced with “dorsal rim with stiff setae in basal third”

p. 378: Fig. 11.61 – the drawings a and b were moved to Fig. 11.62, and the caption for 11.62 should be for abdominal segments 4–6.

p. 379: Fig. 11.62 – the drawings a and b were moved to Fig. 11.61

Chapter 12:

p. 413: Fig. caption 12.13 – “Abdominal segments 8–10” was changed to “Abdominal segments 9–10”

p. 415: Fig. 12.17 – the images were reversed

p. 421: Fig. 12.30 was replaced; in figure caption, “ventral” was replaced with “dorsal”

p. 424: in couplet 23, “prothoracic” was replaced with “mesothoracic”, and in couplet 23', “mesothoracic” was replaced with “prothoracic”

p. 427: couplet 27', “Palpal setae 6–8” was replaced with “palpal setae 5–10”

p. 464: couplet 1, 2nd line, “prementumwith” was changed to “prementum with”

p. 526: couplet 2, 2nd line, “middorsal” was changed to “max”; same change in couplet 2'

p. 546: Generic Diagnosis, 2nd column, lines 12 to 17, replace the sentence “One other distinction that holds for both *Plathemis* species is that the anal appendages are shorter than in *Ladona*, the epiproct only 0.95–1.10 times the combined length of S9 and S10 (epiproct L in *Ladona* 1.4–1.5 times combined L S9 and S10).” with “One other distinction that holds for both *Plathemis* species is that the anal appendages are shorter than in *Ladona*, the epiproct only 0.95–1.10 times the combined length of S9 and S10 measured dorsally (epiproct L in *Ladona* 1.3–1.7 times combined dorsal L of S9 and S10).”

p. 556: couplet 5 and 5', line 2, “hook” was added between “middorsal” and “L” so it reads “S7 middorsal hook L”

p. 575: 1st column, Johansson & Samuelsson (1994), vol. # was changed to 100:74–79. Also, in Landwer & Sites (2010), “1/2” was deleted so it reads “136:1–105”
