

## Acknowledgements for refereeing

The Editor wishes to thank all the referees of published articles in Volume 24, as well as those who gave of their knowledge and time but upon whose judgement rejections had to be made (superscript gives the number of manuscripts reviewed for this volume if more than one).

## Corrigendum

An error of omission appeared in *Env. Biol. Fish.* 22 (1): 69–77, 1988. The second sentence in the second paragraph of the second column on page 70 should read: 'Fractionation of aluminum was similar to the scheme used by Campbell et al. (1983). Total aluminum was measured in samples acidified to pH 1.4 . . .'. The authors apologize for the error.
