

## **Errata**

Loren W. Tauer, “Economic impact of future biological nitrogen fixation technologies on United States agriculture”, *Plant and Soil* 119 (1989): 261–270.

Due to an error in converting from English to metric units the regional soybean yields in Table 2 and the regional corn, milo, wheat, barley and oats yields in Table 5 must all be multiplied by the factor 6.11. The soybean yield in Illinois, for example, should be 2407 kg ha<sup>-1</sup> rather than 394 kg ha<sup>-1</sup>. On page 265, column 2, line 3, the additional yield of soybeans should be 240 kg ha<sup>-1</sup> rather than 36 kg ha<sup>-1</sup>.
