

Erratum: Determination of the Thermal Boundary Resistance in the Transport Approach*

N. Perrin

Groupe de Physique des Solides de l'Ecole Normale Supérieure, Paris, France

(Received June 9, 1978)

On p. 262, following Eq. (13), $J_e = -K_e \cdot \nabla T_e$, there should appear:

“with

$$-\nabla \cdot J_e = \sum_{\mathbf{q}} \hbar\omega [\bar{N}(T_e) - N]/\tau \quad (13a)$$

The above electron energy balance equation relates the electron temperature to the phonon distribution.”

Therefore, on p. 263, in Section 4, the sentence, “The result is injected in Eq. (13) . . .” should be replaced by “The result is injected in Eqs. (13) and (13a) . . .”
