

Correction

We would like to make the following correction to the review, written by Michael Sperberg-McQueen, of Nancy Ide's book, *Pascal for the Humanities*, which appeared in *CHum* 21, 4. The third paragraph of the review, on page 261, column 2, should begin:

Given her premise, Ide's choice of Pascal as the teaching

medium comes as no surprise. Other languages may simplify certain text-oriented processes: Snobol and Icon, for example, and many dialects of Pascal, make handling character strings easy for the programmer. But they do so by masking just how much work the CPU must do in handling strings. Without relying . . .

We extend our apologies to Michael Sperberg-McQueen for this error.
