

## OBITUARY

We record with deep regret the passing of our colleague, Friedrich Fischer, on July 23rd at the age of 52 years. By his death ophthalmology has lost one of its outstanding research workers, and we are all the poorer by the loss of a colleague with inestimable personal qualities.

An account of Fischer's life and activities will be given in the next volume of Documenta Ophthalmologica.

A. J. Schaeffer.

Arnold Sorsby.
