Erratum

Characterization of a citrate-negative mutant
of *Leuconostoc mesenteroides* subsp. *mesenteroides*:
metabolic and plasmidic properties

J. Lin, P. Schmitt, and C. Diviès

Département de Microbiologie-Biotechnologie, Ecole Nationale Supérieure de Biologie Appliquée à la Nutrition et à l'Alimentation (E.N.S. - B.A.N.A.), Campus Universitaire Montmuzard, F-21000 Dijon, France

In: Appl Microbiol Biotechnol (1991) 34:628-631

On p. 629 the time axis in Fig. 2 should read time (h) [not: (min)]. See corrected Fig. 2 below:

Fig. 2. Growth and utilization of citrate by a citrate-negative mutant and the parental strain of *L. mesenteroides* subst. *mesenteroides* 19D in modified MRS medium (see Materials and methods) at 28°C, pH 6.5: $\blacktriangle$, $\triangle$, growth in 55 mM glucose; $\blacksquare$, $\square$, growth in 55 mM glucose plus 22 mM citrate; $\bullet$, $\circ$, utilization of citrate. Closed symbols (parental strain); open symbols (citrate-negative mutant); O.D., optical density

On p. 630 in Table 2 the lactate dehydrogenase section should read as follows:

Lactate dehydrogenase				
NADH	11.71	7.755	10.99	7.531
NADPH	0.00	0.000	0.00	0.000
