
ANNOUNCEMENT**The XIth International Workshop on Alloantigenic Systems in the Rat**

This conference will be held in Toulouse, France, at the Universite Paul Sabatier on August 21–24, 1996. The main topics will include: MHC and non-MHC alloantigenic systems, genetic mapping, T and B cells (receptors, subsets differentiation), cytokines, antigen-presenting cells, transplantation (allo and xeno, solid organ, and bone marrow),

autoimmunity, monoclonal antibodies, chimeric molecules, and transgenic rats. Further information may be obtained from Professor Philippe Druet, INSERM U28 – Hopital de Purpan, Place du Docteur Baylac, 31059 Toulouse Cedex, France; Telephone: ++33-61-77 25 66. Telefax: ++33-61-77 25 68.

Nucleotide sequence of HLA-B*2706

Immunogenetics 39: 219, 1994

In the sequence published here nucleotide 704 is reported to be a “C”, but in fact is a “G”. This induces a Gly substitution for Ala211 in the alpha-3 domain of the mature B*2706 molecule. The sequence entry has in the meantime been corrected in the EMBL Databank.
