

## *Erratum*

### **Recovery from conduction failure in optic axons spared by lesions in the rat**

A.P. Foerster

Exp Brain Res (1990) 79:564–581

On page 579, right column, first paragraph, the third line from bottom starts with “emyelination ...”, but should read: “remyelination ...” instead.

---

## *Announcement*

### **International Quincke Symposium “Barrier concepts and cerebrospinal fluid analysis” Göttingen, September 19–21, 1991**

The goal of this symposium is to bring together neurologists, basic researchers in the field of neurobiology, clinical neurochemists, pharmacologists and psychiatrists. The concept of central nervous transport barriers shall be discussed and – where necessary – revised. In the last few decades, researchers in this field have paid dearly for incorrect barrier models and it is our aim to facilitate future developments.

The symposium will be held under the auspices of the World Federation of Neurology (WNF) and the German Neurological Society (DNG).
