Erratum

Vertical eye movements related signals in antidromically identified medullary reticular formation neurons in the alert cat

J. M. Delgado-García, P. P. Vidal, C. Gómez, and A. Berthoz

Exp Brain Res (1988) 70: 585–589

In the above article an error of quotation has been made for which the authors apologize to A. Grantyn and R. M. Grantyn.

On p. 588, right column, line 9 in the last paragraph, the text should read:

This finding is in agreement with the fact that the medullary reticular formation underlying PH nucleus

receive collaterals from tecto-reticulo-spinal neurons (Grantyn, A. and Grantyn, R. (1982)) and also projects to the spinal cord (Peterson 1977).

As a consequence, the reference list should have the following addition: Grantyn A, Grantyn R (1982) Axonal patterns and sites of termination of cat superior colliculus neurons projecting in the tecto-bulbo-spinal tract. Exp Brain Res 46: 243–256.
