### Erratum

Kybernetik, 7, 175–183 (1970), article entitled "Probabilistic Models for Determining the Input-Output Relationship in Formalized Neurons. I. A. Theoretical Approach" by L. M. Ricciardi (Dept. of Theoretical Biology, The University of Chicago) and F. Ventriglia (Laboratorio di Cibernetica del C. N. R. Arco Felice, Napoli). Equation (4.25) is valid only under the condition that the input processes possess monotonically non decreasing realizations, being otherwise arbitrary. The validity of Equations (4.26)–(4.33) is also subjected to this condition.
