A Geometric Model of the Rat Kidney

R. Kainer

The formula 5 c on page 93 must read:

$$da = \gamma_P^{(N-2)} \frac{s\sqrt{N}}{\sqrt{N-2}} \sqrt{\frac{\sum\limits_{i=1}^{n} g_i\, m_i\, x_i^2 \Big/ \sum\limits_{i=1}^{n} g_i\, m_i}{\sum\limits_{i=1}^{n} g_i\, m_i\, (x_i - \overline{x})^2}} = db\sqrt{\overline{x^2}} \, .$$
