Cell Tissue Res (1990) 260:555–563

Due to an unfortunate error, the data in Table 5 were incorrectly typeset. The table should have read as follows:

Table 5. TEM morphometric estimates for control and PAN-incubated (500 µg/ml) rat glomerular podocytes

Values are means

SD is the standard deviation within animals

Means in each column differing by more than the least significant difference (LSD1 or LSD2 as appropriate) are different at the $p < 0.05$ level

$V_{V_{pod,glom}}$ volume of podocytes per unit volume of glomerulus (podocyte volume density);
 $V_{S_{pod,GBM}}$ volume of podocytes per unit surface area of glomerular basement membrane;
 $V_{V_{nuc,pod}}$ nuclear volume density of podocytes;
 $S_{V_{pod,glom}}$ surface area of podocyte plasma membrane per unit volume of glomerulus (podocyte surface density);
 $S_{S_{pod,GBM}}$ surface area of podocyte plasma membrane per unit area of glomerular basement membrane;
 $S_{V_{pod,pod}}$ podocyte surface area to volume ratio;
 # filtration slits/100 µm GBM number of filtration slits per 100 µm of glomerular basement membrane;
 $S_{S_{lpm,bpm}}$ surface area ratio of podocyte lateral plasma membrane to basal plasma membrane
