**Genetic differentiation in carbon isotope discrimination and gas exchange in *Pseudotsuga menziesii*****A common-garden experiment**

Oecologia (1993) 93: 80–87

All gas exchange data presented in Table 1 should be replaced by the four columns in the following table. The original figures are correct except for plot A/g against altitude in Fig. 3d, which should have the stronger trend ( $r_{A/g, Alt} = -0.68$ ,  $P = 0.0002$ ) than the original plot. Finally, the correlation coefficients between A/g and height or diameter in Table 3 were incorrect; they should read  $r_{A/g, Height} = 0.56$ ,  $P = 0.0039$  and  $r_{A/g, Diameter} = 0.58$ ,  $P = 0.0026$ . Our conclusions are unchanged. We apologize for any confusion caused by these mistakes.

$A_{max}$ ( $\mu\text{mol m}^{-2}\text{s}^{-1}$ )	$g$ ( $\text{mmol m}^{-2}\text{s}^{-1}$ )	$A_{max}/g$ ( $\mu\text{mol}/\text{mmol}$ )	$c_i/c_a$
