

The plasmids of *Acetobacter xylinum* and their interaction with the host chromosome

S. Valla, D.H. Coucheron, and J. Kjosbakken

Laboratory of Biotechnology, The Norwegian Institute of Technology, The University of Trondheim, N-7034 Trondheim-NTH, Norway

Mol Gen Genet (1987) 208:76–83

The correct Table 2 should read:

Table 2. Conjugative transfer of plasmids between *A. xylinum* strains

Donor	Recipient		Transconjugant	
	A ^a	B ^b	A ^a	B ^b
class L (16.64)	class L	class H	class L (16.64)	class L (n.d.)
class I (16)	class L	class H	class I (16)	class H (44)
class I (49)	class L	class H	class I (49)	class H (49) ^c

nd., not determined

The numbers refer to the size of the *A. xylinum* plasmids with a *TnI* insertion. Plasmid patterns designated class L, I, and H are as described in this report

^a Data from Valla et al. (1986)

^b Data from this report

^c Deduced from hybridization analysis. The plasmid band was invisible after EtBr staining of the gel
