Isolation of Rec⁻ Mutants from an F-prime Merodiploid Strain of *Escherichia coli* K-12

K.A. Stacey and Robert G. Lloyd

Molec. gen. Genet. **143**, 223—232 (1976)

On page 229, second column, second paragraph should read:

When the *metE* linked mutation was transferred to a strain that is temperature sensitive for *recA*, the double mutant proved unable to grow at the restrictive temperature (Lloyd et al., 1974).

R.G. Lloyd
