

Erratum

Spontaneous Symmetry-Breaking Energy Functions and the Emergence of Orientation Selective Cortical Cells

D. M. Kammen and A. L. Yuille

Biol. Cybern. **59**, 23–31 (1988)

The *Note Added in Proof* in Kammen and Yuille (1988) [1] should be deleted. After clarification by the author [2] we see that the model of orientation selectivity proposed by Linsker [3] (1986) generates orientation selective cortical cells *without* the use of an asymmetric correlation function.
