

V. K. Dobrev: 'Multiplet Classification of the Indecomposable Highest Weight Modules over the Neveu–Schwarz and Ramond Superalgebras', *Lett. Math. Phys.* **11**, 225–234 (1986) (Received: 5 January 1987).

I would like to correct the following *errors* :

- (1) In (6b)  $pm > qn$  should be replaced by  $pm \geq qn$ ;
- (2) Subtype  $N_-^{22}$  involves only  $\hat{S}$  multiplets; thus all mention of  $\hat{R}$  in (14) and (16) should be deleted; consequently  $p' \equiv \tilde{p}$ ,  $q' \equiv \tilde{q}$ ;

and *misprints* :

- (1) The text after Equation (7) 'we are ...' should be 'and are ...';
- (2) In (8)  $V_{10}$  should be  $V'_{10}$ ;
- (3) In the right-hand side of (17)  $m, n$  should be interchanged and  $p, q$  should be replaced by  $\tilde{p}, \tilde{q}$ , resp.;
- (4) In the Remark on page 231 the correct expression for  $h'$  is  $h' = \frac{1}{2} + \frac{1}{4}\mu - h$  (compare with (21) and (22)).

*Ref.* [14] was published in a slightly shortened form in the *Proceedings of the XIII International Conference on Differential Geometric Methods in Theoretical Physics* (Shumen, 1984), eds. H. D. Doebner and T. D. Palev (World Sci., Singapore, 1986) pp. 348–370.
