Erratum

The Rabenhorst-Syndrome A Cardio-Acro-Facial Syndrome

Z. Kinderheilk. **117**, 109—114 (1974)

The corrected subtitle should read as above. The second sentence of the introduction should read: The reported occurrence of associated extracardial malformations varies from 9 to 43% (Campbell, 1965; Quittek, 1968; Heck, 1955), reflecting size and age group of the sample, the applied definition of the term malformation, and whether the material was gained clinically and/or by autopsy.
