

## **Corrigendum: 'Asymmetric triple-core couplers'**

Y. CHEN, *Optical and Quantum Electronics* 24 (1992) 539

This paper concerns asymmetrical triple-core couplers which include the special case of symmetrical triple-core couplers. That special case of symmetrical triple-core couplers was first considered by Sheem in 1981 (see reference 1 of the above paper). Subsequent to the publication of my paper, I have learned that this special problem of the symmetric triple-core couplers has been re-examined in greater depth by Andrew Stevenson in his PhD thesis submitted to the Australian National University in 1989. For completeness, I would like to bring this thesis also to the attention of the reader.

I thank Andrew Stevenson for bringing his work to my attention.
