Muscle Weakness Following Eccentric Work in Man

C. T. M. Davies and M. J. White

Pflügers Arch (1981) 392:168–171

Page 169: The last sentence should read “Thus if the ratio of the 20 Hz to the 50 Hz...” *not* “200 Hz to the 50 Hz”.

Page 170: In the Discussion, second paragraph, the sentence starting “In negative work muscle temperature (T_m) rises to a greater extent than in positive exercise [9]” should continue “and though T_m was *not* measured...”.
