

the presence of ligand bands in the same region. An analogous chloro-bridged structure has also been reported by Stephenson for the  $\text{Ru}_2(\text{OCOR})_4\text{Cl}$  complex<sup>(10)</sup>.

In all the complexes a strong band at  $575\text{--}450\text{ cm}^{-1}$  has been assigned to the M–N stretching frequency.

#### Acknowledgement

We thank Prof. W. Rahman for providing facilities. Neelam Singhal thanks the CSIR (New Delhi) for a Post Doctoral Fellowship. We thank Prof. P. T. Manoharan for arranging for the i.r. spectra to be recorded at the run Regional Sophisticated Instrumentation Centre, IIT, Madras, Prof. S. S. Sandhu for magnetic measurements and reflectance spectra, and Dr. R. C. Aggarwal (B. H. U. University, Banaras) for the magnetic susceptibility measurements.
