United Nations Industrial Development Organisation, *Industry in a Changing World*, United Nations, New York, 1983.

Erratum

In the article by David M. Kemme (Vol. 18, no. 1) the equation at the bottom of page 17 should read:

$$\text{But now } \frac{\varphi_k}{\varphi_l} = \frac{(1 + \lambda)r}{(1 + \lambda - a)\bar{w}} \text{ and } \frac{r}{(1 - a)\bar{w}} < \frac{(1 + \lambda)r}{(1 + \lambda - a)\bar{w}} < \frac{r}{\bar{w}}, \text{ and}$$

the enterprise input mix is closer to the profit maximizing firm's.
