### Addendum

Dr W. Sutantyo kindly pointed out to us an inadvertent error in the article by McCluskey and Kondo (1971) referenced in the current paper. The Equation (6) in that paper should read

$$\frac{a}{a_0} = \frac{A + B}{2A + B - C - 1} \quad (6)$$

As a result, the Tables Ib and Ic also change slightly; the corrected Tables Ib and Ic are given. These corrections do not alter our conclusions in that article. In fact, as may be seen, the corrected results are slightly more in favor of the binary *not* breaking up after the supernova explosion.

TABLE Ib

Computed values of  $a/a_0$  and  $e$  for  $C=0.20$
