

**A THEORY FOR THE GRAVITATIONAL POTENTIALS  
OF SPHEROIDAL STELLAR SYSTEMS  
AND ITS APPLICATION TO THE GALAXY**

*An Addendum*

(Received October 5, 1977)

The published version of our recent paper (*Astrophysics and Space Science* **47**, 299, 1977) failed to include (through no fault of the authors) a note in the manuscript acknowledging the priority of the work of Miyamoto and Nagai (*Astr. Soc. Japan* **27**, 533, 1975), although this *reference* was included in the published version. This regrettable omission has caused us considerable pain and embarrassment. It is therefore our object to reacknowledge the priority of the aforementioned work.
