ERRATUM

Re: 'Fourier Analysis with Unequally-Spaced Data', by T. J. Deeming, *Astrophysics and Space Science* **36**, 137 (1975).

In the program printed in the appendix to this paper there are errors on p. 158 which will prevent its correct operation as listed. The following corrections should be made

Instead of A = 2.*PI*K*DF	read	B = 2.*PI*K*DF
Instead of A = A*T(I)	read	A = B*T(I)

Also some versions of FORTRAN will not compile correctly the divisions by N*N in the last part of the program. To correct this, replace N*N by FLOAT(N*N) if necessary.
