

Erratum

Species height and root symbiosis, two factors influencing antiherbivore defense of woody plants in East African savanna

R. Thomas Palo¹, Juan Gowda¹, Peter Högberg²

Oecologia (1993) 93:322–326

Due to an unfortunate error in the legend of Fig. 1 symbols are reversed. The correct figure legend and symbols are:

Fig. 1. Regression of polyphenols in mature leaves (mg/g tannic acid equivalents) against height for N₂-fixing (▲) and non-N₂-fixing (●) species. $Y = 17.8 - 0.7 \times \text{height} - 3.5 \times \text{N}_2\text{-fixing ability}$. Polyphenols measured as absorbance of Folin-Ciocalteu reaction at 740 nm and confirmed by TLC
