(Received July 29, 1986)

The experimental curve for 0 bar was incorrectly drawn in Fig. 12. None of the other figures or results of the paper are affected by this. The graph for 0 bar in Fig. 12 should be replaced with the accompanying figure.

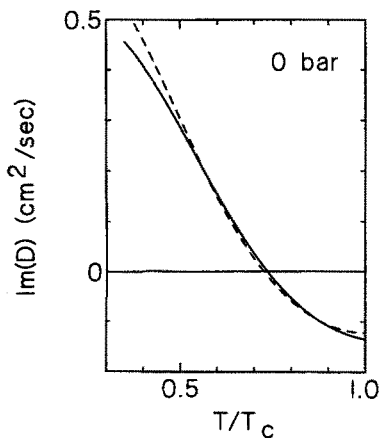

Fig. 12. Imaginary part of the spin diffusion coefficient of the B phase at 0 bar and a Larmor frequency of 2 MHz. (—) Experimental results obtained by fitting to the spin-wave peak frequencies as in Fig. 11. (--) The theoretical predictions of ref. 7, recalculated with values of F_0^3 and v_F from ref. 28.
