Erratum

In the paper "Developmental studies in trebouxoid algae and taxonomical consequences" by E. TSCHERMAK-WOESS [Pl. Syst. Evol. **164**: 161 – 195 (1989)] the seventh paragraph on p. 193 was incorrect, the diagnosis of subg. *Eleutherococcus* should be read:

Subg. *Eleutherococcus* (WARÉN) TSCH.-WOESS, comb. nova $\equiv$ *Cystococcus* subg. *Eleuterococcus* WARÉN (1920: 55)²². Typus subg.: *Cystococcus glomeratus* WARÉN (1920: 56) (Lectotypus hoc designatus) = *Trebouxia glomerata* (WARÉN) AHMADJIAN, Amer. J. Bot. **47**: 679 (1960). Reproductio zoo- et aplanosporis perfecta; autosporae desunt. Zoo- et aplanosporangiorum origo eo subgen. *Trebouxiae* similis, sed cellulis matricalibus pro maxima parte grandis interdum cellulae parvae interjectae. Cellulae filiales 64, 128, interdum reductae usque ad 8.

²² Since Eleuter- is obviously a wrong transliteration for ἐλεύθερ-, I have changed the subgenus name in *Eleutherococcus*.
