

## Dobzhansky Memorial Prize

The Society for the Study of Evolution is instituting the THEODOSIUS DOBZHANSKY Memorial Prize, to be awarded annually to a young scientist for support of field or laboratory research in evolution. Contributions (U.S. tax exempt) are being solicited by a committee of DOBZHANSKYs friends, but should be made payable to the Society for the Study of Evolution and mailed to

DOBZHANSKY Memorial Committee  
c/o Prof. HOWARD LEVENE

Room 619 Mathematics  
Columbia University New York,  
New York 10027

### Errata

Vol. 125 (3): The footnote on p. 156 is to be transferred to p. 159. On p. 156 the following footnote should have appeared: "The occurrence in a few species of some female-sterile flowers or occasionally of functionally male individuals (CARR et al. 1971), though interesting, is clearly secondary and of minor consequence to the general patterns of speciation."

Vol. 126 (2): On p. 223, line 41 the 2C DNA content of *Allium cepa* should be read as 33.5 pg instead of 35.5 pg. The DNA values of *Helianthus* cultivars have been calculated with the right standard.
