

ERRATA

At the Metrological Institutes (Brief Abstracts of Some Completed Work) [Measurement Techniques, No. 2, 292-294 (1970)].

On p. 294 it was incorrectly indicated that the work described in "Electro-osmotic Cells for Automation Control, Measuring, and Computing Techniques, and Possible Design of Systems of Measurements on these Electro-osmotic Cells" was conducted at the Siberian Governmental Scientific-Research Institute for Metrology. Actually it was conducted at the Tbilis branch of the VNIM, and the signature L. N. Tavdgiradze refers only to it.
