

Erratum

In the article “Cognitive-Behavioral Group Treatment for Social Phobia: Effectiveness at Five-Year Follow-Up” by Richard G. Heimberg, which appeared in *Cognitive Therapy and Research*, Vol. 17, No. 4, August 1993 (p. 325), the superscripts *e* and *f* were reversed in the body of Table I. The corrected version of Table I appears on the following page.

^aNumbers in parentheses are standard deviations. CBGT = Cognitive-Behavioral Group Therapy, ES = Educational-Supportive Group Psychotherapy, SADS = Social Avoidance and Distress Scale, FNE = Fear of Negative Evaluation Scale, FQ-Social = Social Phobia subscale of the Fear Questionnaire, PRCS = Personal Report of Confidence as a Speaker, BDI = Beck Depression Inventory.

^bCBGT *n* = 10, ES *n* = 9.

^c*F*-ratios based on 1 and 16 degrees of freedom for main effect of treatment, analyses of covariance of long-term followup scores with pretreatment scores as covariates, one-tailed test of significance.

^dWithin-group *t*-tests evaluating significance of change from pretreatment to long-term followup assessment.

^e*p* < .10.

^f*p* < .05.

^g*p* < .01.
