

ADDENDUM

Dijksma, A., Langer, H. and De Snoo, H.S.V.: Selfadjoint π_K -extensions of symmetric subspaces: an abstract approach to boundary problems with spectral parameter in the boundary conditions, Vol. 7 1984, pp. 459-515.

In the list of references the following two papers should be mentioned:

32. R. Shonkwiler: On generalized resolvents and an integral representation of Nevanlinna. J. Math. Anal. Appl. 40 (1972) 723-734.
33. P. Sorjonen: On linear relations in an indefinite inner product space. Ann. Acad. Sci. Fenn. AI, 4 (1978/1979) 169-192.

The following misprints should be noted:

p. 476. Line 4, delete and a.

p. 497. Lines 5-7, replace $\hat{T}(\varrho)$ by $\hat{T}(\bar{\varrho})$; the reference to this formula is (7.9).

p. 506. Remark 2, replace $\sigma(T)$ by $\sigma(T) \cap \phi_0$.
